

Ringmaten

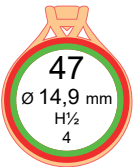

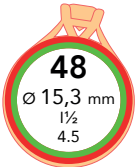

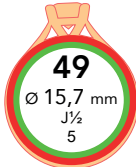

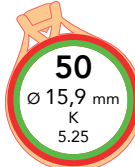

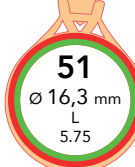

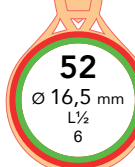

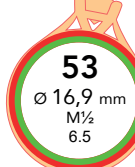

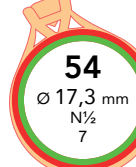

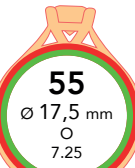

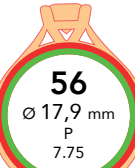

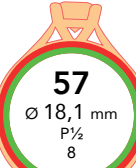

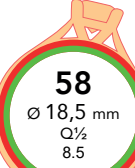

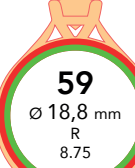

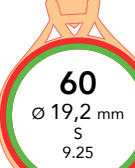

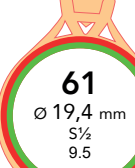

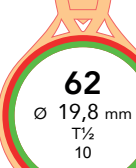

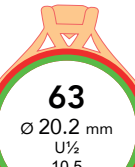

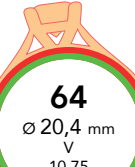

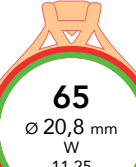

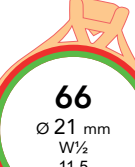

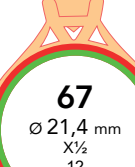

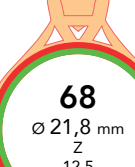

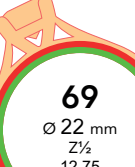

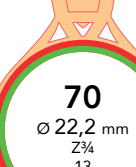

Opmeten van je ringmaat

Voor het juiste formaat moet je voor het afdrukken controleren of de pagina verscaling op 100% staat. Dit kan je vinden in het print dialoogscherf (ctrl-p). Je kunt het achteraf controleren door de liniaal op de afdruf te vergelijken met een eigen liniaal of meetlint. (10 cm moet echt 10 cm zijn, anders kloppen de ringmaten ook niet).

Vind jouw ringmaat

Als je een goed passende ring hebt, kun je deze op de cirkels hieronder neerleggen. Let op dat de binnenste cirkel zichtbaar is, de buitenste cirkel mag niet meer te zien zijn (van bovenaf gezien). Dit is de juiste maat. Twijfel je tussen twee maten dan raden wij de grootste maat aan. Ook kun je een ringenbos bij ons bestellen om de juiste maat exact mee op te meten.
